Cloud-based hospital management and patient care software

We believe to provide 360 Degree Assistance on a single platform for all your Organizational needs. Followed by end to end services for Healthcare Provides.

We have put in an enormous amount of effort to ensure that we have a Pan India presence, in the form of tie-ups with multiple network service/product providers who together ensure that health care is never a challenge of any kind.

Help Hospitals build a strong network that fuels better Health Care and professional growth.

Our software is based on Hospital Information System (HIS), providing modern solution that enables medical facilities to overcome the biggest challenges in healthcare delivery today. We enables hospitals/clinics/medical centers to:-

Manage all departments, patients, and staff with ease

Improve patient care experience

Take better decision with advanced reporting features

It is a comprehensive cloud-based Hospital Information System software that is specially designed for hospitals and clinics with affordability, scalability and ease-of-use in mind. Comprehensive and rich in features, to cater every hospital needs, it is the preferred choice for healthcare providers who want a proven HIS solution.

Key Highlights

COMPREHENSIVE

All-in-one software solution fulfilling every requirement for efficient operations and management of hospital

PROVEN SOLUTION

HIS solution is a best proven platform that has been implemented in healthcare facilities.

SCALABLE

It can fulfill most of the requirements of hospitals and clinics. Our software grows with your business. As your business scale up, our solution can easily support it.

EASY-TO-USE

Built with the customer needs in mind, easy to learn and use. Functions within the modules have been tailored to meet the needs of most hospitals.

INNOVATIVE

Best Innovative solution in healthcare with focus on Speech-to-text for Clinical Staff, Interactive EMR, single click e-prescription generation, payment gateway functionality to allow Patients to pay online towards pending payments and many more

COST EFFECTIVE

Best cost efficient software, having an option of monthly payment, according to the facilities consumed.

AVAILABILITY

Our services are available 24x7 on the cloud or your internal server. We provides peace of mind and allows healthcare providers to focus on patient care

SECURITY

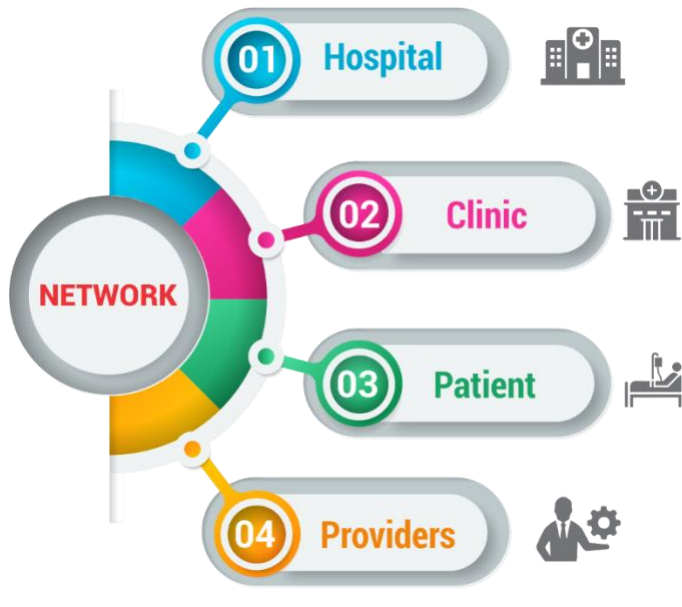

Experienced and skilled HIS implementation services team ensures that the HIS solution is free from security breaches. This includes protecting computers, networks, programs and data from unauthorized access or damage and data privacy is restored.

ACCESSIBILITY

Easy to access on desktop, mobile and tablets, designed with mobility in mind

Our Network & Patient Database

Imagine all patient health data under a single platform

We provide services to digitalize, Safe and secure your patient data on a fully secure platform, complying with all the norms and guidelines of retention policy and Digital information security in Healthcare Act (DISHA).

Patient health information is scattered in offices and hospitals across the country. We provide a common, secure platform that aggregates all Patient electronic health and claims information. Our technology utilizes standardized health data formats to automatically update and store your health information.

New medications? Log in to find patients updated prescription list.

New lab results? View them sooner and follow trends over time. By having all patients' data easily accessible in one place, you can concentrate on what really matters.

All the features above are required to ensure success and security when meeting the new rules. Health plans must consider a broad list of interoperability, deployment, and support aspects to meet these mandates. We have everything a health plans need to meet the regulations. You have flexibility and options with

our platform and services and can utilize one module that provides full solution for end-to-end use cases.

Smart Patient care

Your one stop shop for healthcare that serves as your single point of contact for all that you– and indeed your entire family would ever need to make sure that proper healthcare is provided to each and every one.

At HAND Corp, we take it as our priority to ensure that healthcare – be it in the form of health checkups or wellness cards, as well as Health Risk Assessments, are provided to every patient of your esteemed organization, in the easiest possible manner.

HAND Corp. focuses on bridging the gap between patient centered data and provider needs, thus creating a platform for patients to aggregate and share medical data from external health systems and wearable devices with providers enabling improved healthcare outcomes.

With access to medical records from within the institution, we provide vital information on your patients. HAND Corp. aggregates and automatically updates patient records from external health systems. We're using new nationwide standards that allow for the seamless exchange of health data, so that you have all the information you need to make informed clinical decisions.

Beyond medical record

We know that there is more to patients health than the records from doctor's office. We can connect and store data from your wearable devices like Fitbit, and Google Fit. Use our personalized patient portal to record symptoms, take notes from healthcare visits, and keep track of questions for doctors.

Patient's health, Patient's data, Patient's decide.

Connect

Easily aggregate health data using the patient app.

View

Use the app to understand and manage Patients health data.

Share

Share data with other healthcare providers.

We believe that patient should be in control of their health information. They choose how much data to share and where they want to share it. Looking for a second opinion? No more calling and waiting for faxed records. Need help managing your conditions? Easily share information with healthcare providers.

e-Market

About Us

Ease 'n' Up (Logo)

H.A.N.D Corp. Introduces

Easy 'n' Upgraded solution for healthcare industry

An initiative to make work easy for those, who care for us.

We know how busy a doctor can be, and we totally adore their effort of changing the world, healthier than ever. So we come forward with an initiative to serve all of their professional need, on a single platform.

+ Who we are?

Welcome to Ease 'n' up a product of 'Hospital Associated Network Development Corporated Private Limited' [HAND Corp.].

We are on a mission to help the world act differently and to achieve better health outcomes.

We intend to represent majority of healthcare providers globally. It is an organization advocates with the Government policies, on issues which have bearing on enabling its members organizations to deliver appropriate healthcare services to community at large.

Being a part of the "Digital India" we have launched an e-platform for Hospital as the common patient portal, which facilitates hospitals to provide various services to the patients with registered UHID (Unique Hospital Identification Number).

HAND Corp provides data interoperability between healthcare network, utilizing the latest standards, and patient-authorized access (Compliance with DISHA), to ensure the best insights across healthcare providers.

Our organization intend to build a system, entitle to support entirely digital healthcare industry. It is an API platform for - healthcare providers from health systems, Healthcare supporting industry (Hospital and Medical Furniture's, Equipment, instruments and products), health insurance payers and Patients.

As Data interoperability, we focuses on bridging the gap between patient centered data and provider needs, thus creating a platform for patients to aggregate and share medical data from external health systems and wearable devices with providers enabling improved healthcare outcomes.

The Platform allows Members to connect data within health system electronic health records. As a member healthcare provider, you can read your users' clinical health data from patients who are registered. We believe data from external health systems is a vital, missing piece to improve care and reducing costs and data from other clinics and hospitals fills in this gap.

Our Mission

Our mission is to help all our members in healthcare industry, increase their standard through a structured, positive and professional referral marketing program that enables them to develop long-term, meaningful relationships with quality business professionals.

Our Vision

Our vision is to have healthy India, encompassing society, community and common man at grass root.

Our Objective

We strives to fulfil objectives, by which society and community has right to health in terms of

- Availability (quantity to meet needs).
- Accessibility (non-discriminatory and affordable).

- Acceptability (ethical).
- Quality (clinically sound).
- Affordable healthcare services.
- Ethical standards.
- Innovative medical technology and applied research.
- Patient safety, by peer evaluation mechanism based on the best practices.
- Single window solution concept.

+ What do we do?

Providing 360* assistance to the healthcare providers for their entire professional need.
